EDUCATION

Specialization in Software engineering (2 years) [430 hours]

March 2024 - Currently

Universidad Abierta Interamericana, Buenos Aires

Number of subjects: 8

Main subjects: Formal methods in software engineering, Requirements engineering Software design and architecture, Advanced databases, Web engineering.

Licentiate in bioinformatics (4½ years with thesis) [3409 hours]

March 2019 - October 2023

Facultad de Ingeniería UNER, Oro Verde, Argentina

Number of subjects: 42 and thesis

Main subjects: Sequence analysis and alignment, Software engineering, Drug design and discovery, Digital image processing, Biomolecules structures, Modeling biological systems, High performance computing, Bioethics, Scientific investigation methodology.

"Tecnatura" in data processing and exploitation (3 years)[1850 hours]

March 2021 - November 2023

Facultad de Ingeniería UNER, Oro Verde, Argentina

Number of subjects: 21

Main subjects: Web data exploitation, Project management, Information visualization, Big data analytics, Multivariate data exploration, Data mining.

EXPERIENCE

Fullstack developer - Project Copilot

October 2023 - November 2024

Folder IT

EE.UU.

- Developed a Jira plugin for generating user stories using LLM.

Fullstack developer - Skill Matrix

November 2024 - January 2025

Folder IT

Argentina

- Developed a web page to load companies' professionals' skills.

Data Engineer/Analyst - Skylytics-Forrester

January 2025 - Currently

Folder IT

EE.UU.

- Development of extraction, load, and transformation processes, and dashboard design

PROJECTS

Datawarehouse design

November 2022 - February 2023

Integrating project

- Multidimensional database design for storing and analyzing data from financial transactions in Red Rural SRL, Strobel.

Development of an app for groceries
Personal project

April 2023

- Design and coding of an app for Android to keep track of items, diet and expire dates, with cloud save, using MIT app inventor.

ChippyPyR: Software for expression analysis in RNA probes
Thesis / Final project

May 2023 - August 2023

- Development of a software that allows data processing of RNA probes and visualization of information. In conjunction with the CICYTTP - CONICET in the city of Diamante.

OTHER CERTIFICATIONS

Pearson Test of English General - Level 2(B1) (high achiever)
Pearson Test of English General - Level 3(B2) (high achiever)

December 2016
December 2017

ABILITIES

Programming	Python, JS/TS, SQL, R, C++, C#, L ^A T _E X, LINUX/UNIX, HTML, Matlab
Communication	Spanish (native), English (advanced/B2)
Software	Pentaho Spoon, Power BI, Docker, Azure, AWS, Databricks, Tableau, SFDC
Databases	PostgreSQL, Microsoft SQL server, MongoDB, MySQL, Oracle, Redis
Other	ReactJS, .NET Core, Github, GPT models, Jira API, Google Workspace Enterprise Architect, Microsoft Office
Bioinformatics	VMD, Gaussview, Autodock4, Staden Package, Emboss, BLAST
